## JUNEAU RATE STUDY

## Water/Sewer Revenue Requirements Preliminary Results

by Karyn Johnson, FCS GROUP Principal

December 9, 2013 Assembly presentation December 11, 2013 Public presentation

## Agenda

$\square$ Financial Performance Summary
$\square$ Proposed Financial Policies
$\square$ Revenue Requirement Results
$\square$ Capital Program and Funding
$\square$ Utility Revenue Needs Assessment
$\square$ Input \& policy direction
$\square$ Next steps

## Financial Performance Summary

|  | Financial/Accounting Reporting Perspective |  |
| :---: | :---: | :---: |
|  | WATER | Wastewater |
| Operating Revenue | \$ 4,269,637 | \$ 9,524,807 |
| Operating Expenses |  |  |
| Operating \& Maintenance | \$ (3,017,987) | \$ $(8,198,514)$ |
| Depreciation Expense | $(2,742,498)$ | $(2,739,718)$ |
| Total | \$ (5,750,485) | \$ $(10,938,232)$ |
| Operating Loss | \$ (1,480,848) | ) $\$(1,413,425)$ |
| Non-Operating Income(Expense) | \$ 92,595 | \$ 325,888 |
| Capital Contributions | \$ 111,531 | \$ 270,184 |
| Net Loss | \$(1,276,722) | \$ (817,352) |

|  |  | Cash Pers | pective |
| :---: | :---: | :---: | :---: |
|  |  | WATER | WASTEWATER |
| Operating Revenue |  | \$ 4,269,637 | \$ 9,524,807 |
| Operating \& Maintenance |  | \$ (3,017,987) | \$ (8,198,514) |
| Debt Service |  | (176,993) | (637,712) |
| Available for Capital |  | \$ 1,074,657 | \$ 688,58 ${ }^{K}$ |
| Annual 10-Yr Capital Spending Plan | \$ | $(2,650,000)$ | \$ $(6,490,000)$ |
| Annual Funding Shortfall |  | \$ (1,575,343) | \$ $(5,801,419)$ |
| Amount Available for Capital Divided by Depreciation determines Percent of Depreciation Funded by Rates |  |  |  |
| Water \$1,074,657 / \$2,732,498 = 39\% |  |  |  |
| Wastewater \$688,581/\$2,739,718=25\% |  |  |  |
| $\uparrow$ |  |  |  |

## Proposed Financial Policies

| Description | Recommendation | Comments |
| :---: | :---: | :---: |
| Operating Reserve |  |  |
| Provide adequate working capital to accommodate fluctuations in the timing of revenues and expenditures | Maintain minimum balance equal to 30-45 days of operating \& maintenance (O\&M) expense for each utility | May use available reserves above minimum thresholds to help smooth rate increases |
| Capital Reserve $\quad$ _ |  |  |
| Provide a source of funding for emergency repairs and unanticipated capital expenditures | Maintain a minimum balance equal to $1 \%$ of system fixed assets for each utility | Sustained from capital revenues including system reinvestment funding, and operating cash above targets |
| System Reinvestment Funding |  |  |
| Provide a predictable cash resource to fund system replacement and offset annual decline in asset value | Fund an amount annually from rates using depreciation expense as the benchmark | Depreciation is a non-cash expense representing the cost of the annual decline in asset value |
| Maintain rate stability and enhance intergenerational customer equity | Alternative revenue requirement scenarios developed with varying levels of depreciation funding from rates | Funding a greater portion of depreciation from rates would improve the financial position and provide additional cash to help fund the capital program |

## Revenue Requirement Scenario Descriptions

| Water Utility | Baseline | Low | Middle | Top |
| :---: | :---: | :---: | :---: | :---: |
| Current O\&M and Debt | Fully Funded |  |  |  |
| Capital Program | 50\% | 100\% Funding of Identified Capital Needs |  |  |
| Current \$ | \$11.0 million | \$22.0 million |  |  |
| Escalated \$ | \$13.2 million | \$26.5 million |  |  |
| System Reinvestment Funding | 35\% constant | 35\% Constant | Phase-In 68\% | Phase-In 100\% |

| Wastewater Utility | Baseline | Low | Middle | Top |
| :---: | :---: | :---: | :---: | :---: |
| Current O\&M and Debt | Fully Funded |  |  |  |
| Capital Program | 50\% | 100\% Funding of Identified Capital Needs |  |  |
| Current \$ | \$25.5 million | \$51.1 million |  |  |
| Escalated \$ | \$32.4 million | \$64.9 million |  |  |
| System Reinvestment Funding | 25\% constant | 25\% Constant | Phase-In 63\% | Phase-In 100\% |

## Capital Program Funding

$\square$ Priority of applying capital funding resources (level of funding varies by scenarios)

1. Available capital cash reserves
2. System reinvestment funding from rates (depreciation funding)
3. Outside sources: Passenger fees and $1 \%$ sales tax
$\square \quad$ Total of $\$ 8$ million in passenger fees available for water/wastewater - $\$ 1.3 \mathrm{~m} /$ year FY 2017/18 - FY 2022/23
$\square$ Total of \$21.2 million in $1 \%$ sales tax available for water/wastewater - $\$ 4.25 \mathrm{~m} /$ year FY 2019/20 - FY 2022/23
4. Revenue bond debt (repaid over 20 years; $4.5 \%$ interest)
$\square$ CBJ will pursue grants / low-cost loans; due to limited availability, not assumed in rate analysis

## Revenue Requirement Assumptions

$\square$ No customer growth over study period
$\square$ O\&M costs adjusted for annual inflation of 2.0\%
$\square$ 10-year capital program stated in current day dollars, adjusted for annual escalation of $4.5 \%$ to date of construction
$\square$ Proposed rate increases reflect utility-wide rate revenue increases; subsequent cost of service analysis will determine recovery by customer class
