INFORMATION RELEASE
September 27, 2022

Gastineau Avenue Landslide Update (2:30 PM 9/27)

As of 2:30 p.m., Tuesday, September 27, site crews have completed a preliminary assessment of the Gastineau landslide area and determined that under the current favorable weather conditions hazard risk has returned to pre-event levels. The immediate area is therefore open to limited residential access. Members of the public without an essential need are still asked to avoid the area to allow clean-up crews to work as swiftly and smoothly as possible. Further assessments are ongoing at this time.

Public Works has begun the process of preparing the area for debris removal; however, we anticipate that this work may take multiple days. In order to allow access for crew vehicles and operations, area residents are asked to **immediately move all vehicles parked within a one block radius of 187 Gastineau Avenue.**

Vehicles that have not been moved will be towed to Zach Gordon Youth Center at 396 Whittier Street. Vehicle owners will **not** be charged any fees and may pick up their vehicles at their convenience.

A timeline for the full restoration of power to the area is anticipated once clean-up operations have progressed further.

Residents impacted by the slide and in need of assistance should contact Tom Mattice at (907) 209-9207.

Further information will be provided as it becomes available.
